Subject: RE: Follow-Up to Class VI Application Questions Meeting

Hi Beau, sorry for the delay in responding. I was out of the office for two weeks and I'm still playing a bit of catchup. I know folks have been working on developing responses, so let me check in to see where we are at. I'll be in touch.
Thanks, David

Hi David,

I saw from your automatic reply that you were out of the office when I sent my last email. I wanted to check back in to understand if there are any updates on resolving our questions. We appreciate the help here.

Our original questions are attached, along with a couple additional ones listed below.

- Our understanding is that Class VI projects are exempt from the provisions of NEPA. Can you confirm if this is accurate?
- Will you please provide contacts for an EPA Region 9 archaeologist and biologist who we can coordinate with for Section 106 and Section 7 consultations?

Thank you,
Beau

Subject: RE: Follow-Up to Class VI Application Questions Meeting

Good morning David,

I wanted to reach back out to ensure our questions hadn't slipped through the cracks. I'm sure your team is busy and we appreciate the guidance.

A couple additional high-level questions have also emerged since our call:

- Our understanding is that Class VI projects are exempt from the provisions of NEPA. Can you confirm if this is accurate?
- Will you please provide contacts for an EPA Region 9 archaeologist and biologist who we can coordinate with for Section 106 and Section 7 consultations?

Thank you,
Beau

Subject: Follow-Up to Class VI Application Questions Meeting

David,

We enjoyed the discussion on Monday and appreciate you making the time for our questions. Attached are the list of questions that we didn't fully resolve in our meeting, but would like to continue to pursue clarity on. We'd appreciate any guidance you can offer here and would be happy to follow-up with an additional call if you'd prefer to discuss.

*Note: At Calvin's advice, we revisited the 'Considerations for Conversion of Other Well Types to Class VI' section of the well construction guidance document and refined question #1 as a result. This new information can be found on slide 3.

Please feel free to reach out with any follow up-questions.

Thank you,
Beau
